DETAILED ACTION

Priority

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

This application is claiming the benefit of a prior filed nonprovisional application under 35 U.S.C. 120, 121, or 365(c). Copendency between the current application and the prior application is required.

Specifically, the filing date of this application is just under 30 months from the foreign priority date but there is no evidence of record that Chapter II was requested in the parent PCT/EP99/09157 in order to maintain pendency for 30 months from the foreign priority date (see MPEP 1895).

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 5. Claim 27 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that

Application/Control Number: 09/874,298

Art Unit 1733

the inventor(s), at the time the application was filed, had possession of the claimed invention.

This is a new matter rejection.

The original disclosure recited the method for increasing the load capacity of the tire as requiring the step of limiting the radial extension inwards of the ends of the reinforcing structure so that they do not extend beyond the radially innermost profile of the bead cores and as not requiring eliminating the inflection points along the extension of the carcass reinforcing structure neutral profile (see for example original claims 14 and 15), which is not consistent with new claim 27.

- 6. Claim 27 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The lack of written description noted in paragraph 5 above also results in a lack of enablement for the method for increasing the load capacity of the tire (no disclosure of how to increase the load capacity of the tire without the step of limiting the radial extension inwards of the ends of the reinforcing structure so that they do not extend beyond the radially innermost profile of the bead cores and with eliminating the inflection points along the extension of the carcass reinforcing structure neutral profile as now recited in claim 27).
- 7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 8. Claim 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 09/874,298

Art Unit: 1733

Claim 26 now appears to be redundant (see original claim 15: this property appears to be inherent in the structure now required in claim 16).

Allowable Subject Matter

- 9. Claims 16-25 and 28 are allowed.
- 10. The following is a statement of reasons for the indication of allowable subject matter:

 DE 36 31 736 A1 cited by applicant is an example of the prior art tire similar to the claimed tire but wherein the neutral profile of the carcass reinforcing structure is not disclosed as having a continuous curvature devoid of inflection points along the extension between the beads. FR

 1.515.950 cited by applicant is an example of the prior art tire similar to the claimed tire but wherein the neutral profile of the carcass reinforcing structure is not disclosed as intersecting a cross section of a zone enclosing the annular reinforcing cores comprising a series of spirals of metal wire radially superimposed and axially arranged alongside each other. The prior art of record fails to disclose or suggest applicant's tire, including the particular combination of the neutral profile of the carcass reinforcing structure having a continuous curvature devoid of inflection points along the extension between the beads and intersecting a cross section of a zone enclosing the annular reinforcing cores comprising a series of spirals of metal wire radially superimposed and axially arranged alongside each other, in the claimed environment.
- 11. Claim 26 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adrienne C. Johnstone whose telephone number is (703)308-2059. The examiner can normally be reached on Monday-Friday, 10:00AM-6:30PM.

Application/Control Number: 09/874,298 Art Unit: 1733

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Ball can be reached on (703)308-2058. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)308-0661.
